Your tasks:	Error! Bookmark not defined.
Task 1: Identify Business Strategy and Gap	Error! Bookmark not defined.
Analyse Strategy	Error! Bookmark not defined.
Task 2: Recommend a feasible solution	Error! Bookmark not defined.
Task 3: Produce a Project Charter	Error! Bookmark not defined.
Task 4: Project Document	3
Task 5: Project Closure	Error! Bookmark not defined.
Helpful web links to complete the assessment:	5
Search Index	5

Instruction:

This task is to be completed individually. You need to analyse a case scenario and complete all the tasks mentioned after the scenario.

You need to demonstrate your IT project management ability to identify business strategy and gaps. You will also need to suggest a feasible solution to overcome identified gaps and produce a project charter along with a WBS to implement the proposed solution.

Duration:

Trainer will set the duration of the assessment.

All my working could be checked <https://wellsjohn220.github.io/pmt32023by12345>

Case Study:

Going Green application, Green IT Project Management

Project profile

Going "Green" is a mission of many companies around the globe not just for reasons of environmental responsibility, but also for cutting costs in these extremely tight economic times. Green IT efforts represent a specific focus area within enterprises that hold attention to this trend. Green IT leverages information technology to streamline operations, cut costly waste, and reduce the impact on the environment. IT typically consumes only about 10% of an organization's energy costs, but the net effect of a Green IT project is to go beyond just energy saving. To tackle the other 90%, a Green IT project extends into a variety of other departments, and to execute such an endeavour requires an effective project management function in order to identify and prioritize goals. A Green IT transformation can be a complex process.

Vital Statistics:

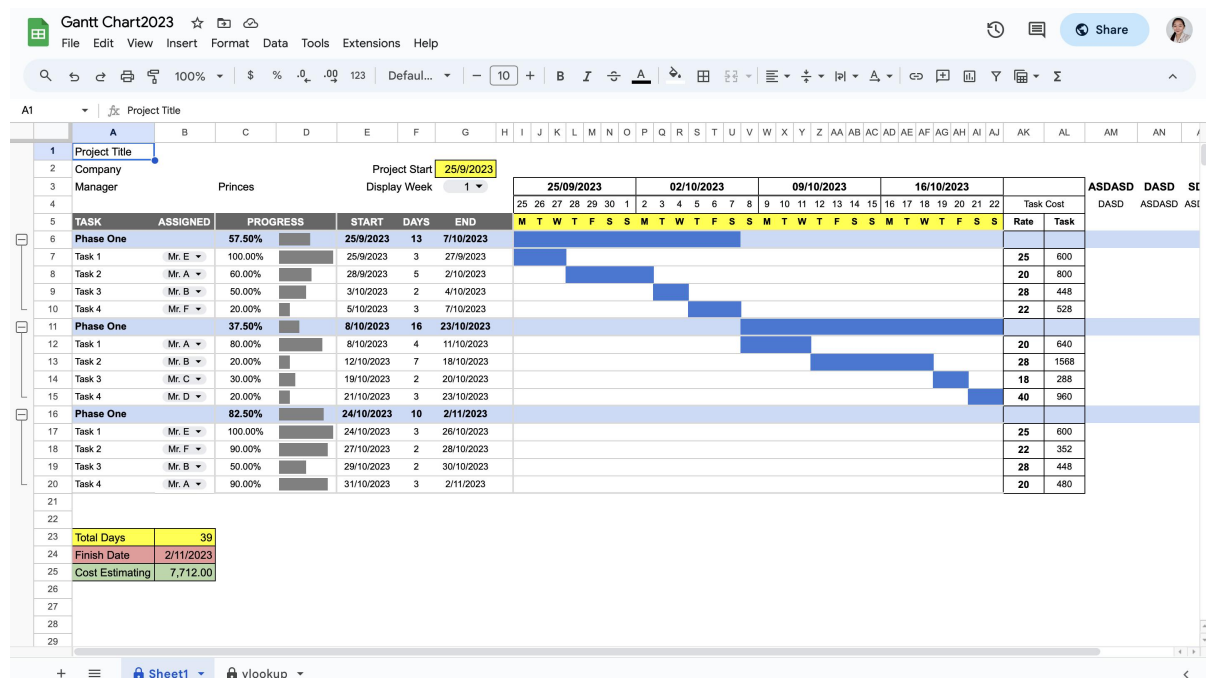

- Number of project tasks - 12
- Project duration - 16 months
- Project budget - \$1,200,000
- Number of users - 50

Because I could not get Ms-Project software. I use google Sheets to made Gantt chart template:

I also think using a simple case, which I knew well, could be better for my learning. Go to website:

ASSESSMENT 2

ASSESSMENT 2

5 Phase of Project Management

A project management life cycle consists of 5 distinct phases including initiation, planning, execution, monitoring, and closure

What is the importance of Project Management

Project management is important because it helps ensure that projects are completed on time, within budget, and to the expected quality of work. It also helps identify and mitigate risks, manage resources effectively, and ensure stakeholders are well informed and involved throughout the project.

Project Management

The mission of the PMO is to introduce and maintain a consistent approach to managing projects.

Strategy Implementation: The 6 Step Process

- 1 Choose your strategy framework
- 2 Build your plan
- 3 Define projects and KPIs
- 4 Establish your strategy rhythm
- 5 Implement strategy reporting
- 6 Link performance to strategy

© 2020

Successful implementation of strategies through projects
Strategy implementation is the process of turning plans into action to reach a desired outcome. Essentially, it's the art of getting stuff done. The success of every organization rests on its capacity to implement decisions and execute key processes efficiently, effectively, and consistently.

Risk Management

Risk assessment is the name for the three-part process that includes: Risk identification, Risk analysis, Risk evaluation.
